TECHNICAL SUPPORT - MACHINE SHOP'S POLICY ON THE BUDDY SYSTEM / BABY SITTERS

SEPTEMBER 18, 1987

To avoid the possibility of someone being injured or becoming ill and unable to call for help, it is the policy of the Machine Shops that no one person should be assigned to work alone.

There must always be at least two persons in a work area. They must have a reasonably clear and unobstructed view of each other. This rule also applies to overtime assignments as well as assignments in confined space areas.
