

Fifteenth International Magnet Measurement Workshop

IMMW 15

August 21-24, 2007

Fermi National Accelerator Laboratory

Dear Colleague,

The Fifteenth International Magnet Measurement Workshop (IMMW) will be held at Fermilab from Tuesday August 21 through Friday August 24, 2007*. It is a great pleasure to invite you to attend the workshop and to participate in its program.

The IMMW has become an important means for communicating and discussing current activities, challenges, ideas, and initiatives in magnet measurement technology and techniques, and is open to all professionals in the field of magnet measurements.

The IMMW consists of presentations and discussions among the workshop participants. The Workshop primarily focuses on equipment and techniques for measuring, testing, and fiducializing accelerator magnets and insertion devices. Other relevant topics are also welcome.

Registration for the Workshop will be available online at the IMMW15 home page: <http://tdserver1.fnal.gov/immw15>. The web page will also contain all of the pertinent information you need to know about the workshop - including travel to Fermilab, lodging, social events, the workshop's program, submission of abstracts, and guidelines for presentations. The web page will be frequently updated.

There will be a tour of the Fermilab magnetic measurement and accelerator facilities during the Workshop, as well as an industrial exhibit. If you are interested in displaying products or services which might be of interest to the Magnet Measurement community, please contact us.

Please reserve the Workshop dates, and feel free to contact me or the conference secretary with any questions. We look forward to your attending.

Best regards,

Joe DiMarco (for the IMMW organizing committee)

* pending final DOE approval
